

MOSBY'S

NURSING SKILLS™

PREPARE FOR EXPERT CARE.

在线护理技术培训系统
产品介绍

什么是 Mosby's Nursing Skills?

由爱思唯尔旗下著名出版品牌**Mosby** 和
Saunders共同奉献的在线护理技术培系统

Mosby's Nursing Skills 包含...

- **800**多种来自权威参考书的护理技术，其中**300**多种儿科护理技术
- 操作步骤详解及视频演示
- 患者手册
- 交互式学习方式，提供复习和反馈
- 来自医院方面最新的新闻和警报

Mosby's Nursing Skills 包含...

- Perry & Potter *Clinical Nursing Skills & Techniques*
- Proehl, *Emergency Nursing Procedures*
- AACN, *AACN Procedure Manual for Critical Care*
- Wong's *Nursing Care of Infants and Children*
- AACN *Procedure Manual for Pediatric Acute and Critical Care*

为护理人员服务

- 为护理人员提供方便、全面的护理技术学习资源
- 提高为病人服务的质量和信心
- 提供交互学习方式，让护理人员便于检测自己的技术水平
- 强化护理知识和资质，发展临床技术
- 与护理实践发展同步

Mosby's Nursing Skills 首页

你可以通过交流、检索、用户工具掌握重要的护理技术

搜索护理技术

- 在检索框内键入关键词搜索
- 按字母顺序搜索
- 按学科搜索
- 按类别搜索

My Skills-我的技术，文件整理工具，偏于找到相关技术及作业

通告- 随时提醒你重要的信息

作业- 显示作业，让你掌握自己的学习进程

Quick Sheet

提供可打印的技术概要，为你详解每项技术的每一个步骤

1. Assess for signs and symptoms of abdominal pain, bloating, and other GI signs and symptoms.
2. Assess for signs and symptoms of abdominal surgery or trauma, GI bleeding, pregnancy, and risk of infection, cancer, kidney disease, alcohol use, and other conditions.
3. Inspect the abdomen for color, scars, venous patterns, rashes, lesions, or abnormal openings. Note any lesion's characteristics.
4. Inspect the abdomen for contour, symmetry, and surface motion. Note any masses, bulges, or localized or localized distention.
5. If distention is suspected, measure abdominal girth by placing tape measure around abdomen at level of umbilicus. With a pen, mark where tape measure was applied.
6. Auscultate bowel sounds with diaphragm of stethoscope in each quadrant. Listen until gurgling or bubbling is heard in each quadrant (at least once in 5 to 20 seconds). Describe sounds as normal, hyperactive, hypactive, or absent. Listen

Extended Text [Print Extended Text](#)

OVERVIEW

Abdominal assessment involves identifying organs located within and near the abdominal cavity. Health complaints, and many reproductive dysfunction and symptoms are one of the most common by alterations in the intestines; or it may result from spinal requires matching the patient's physical signs and symptoms.

To perform an abdominal assessment, the nurse needs detailed knowledge of the underlying anatomy of the upper pelvis, kidneys, rectum, genitalia, liver, gallbladder, pancreas, and reproductive organs. An abdominal assessment is routine for abdominal surgery and for any patient who has undergone invasive diagnostic procedures of the gastrointestinal (GI) tract, such as endoscopy.

The sequence of an abdominal assessment differs from that of other assessments. The nurse begins with inspection and follows with auscultation. It is important to auscultate before palpation and percussion because these maneuvers may alter the frequency and character of bowel sounds.
